JUT RANCHI
- Bachelor of Technology in CSE
- GPA: 8.4 / 10.0

SKILLS

- Next.js
- React
- MongoDB
- Node.js
- Express.js
- My SQL
- REST API's
- Html
- CSS
- Tailwind CSS
- AWS
- Git/Github
- Angular

LANGUAGES

- JavaScript
- Typescript
- Python
- Java
- C
- C++

PROFILE SUMMARY

Aspiring Full Stack Developer with hands-on experience in building responsive web applications using React, Node.js, Express, and MongoDB. Proficient in backend development, REST APIs, and modern UI practices. Eager to contribute to real-world projects and grow within a collaborative development team.

PROJECT

EzMart 🔗
- Full-Stack E-Commerce Platform – Built using MERN stack (MongoDB, Express.js, React, Node.js) with JWT authentication, enabling secure user accounts, product browsing, and cart management
- Backend API Development – Designed RESTful APIs for product/cart operations and optimized database interactions using MongoDB for scalability.

Localite (Group Project – Backend Developer) 🔗
- Developed core backend functionality using Node.js, Express.js, and MongoDB, enabling seamless data handling for location-based content.
- Implemented user authentication, RESTful APIs, and integrated Cloudinary for secure media storage and retrieval.
- Collaborated closely with another backend developer to build a scalable, secure backend supporting a React-based frontend focused on promoting hidden tourist spots.

URL Shortener
- Developed a URL shortening application with Next.js, Tailwind, and MongoDB, enabling secure and efficient link redirection.
- Created a backend logic to store and retrieve shortened URLs securely and accurately. Streamlined user experience with intuitive form handling and instant link feedback.

To-Do List (Frontend Project)
- Created a responsive task management app using React, Tailwind CSS, and React Icons with real-time interaction features.
- Focused on component-based design and clean UI/UX for improved usability and maintainability.

PassOP - Password Manager
- Developed a browser-based password manager using ReactJS and localStorage for secure offline access without server dependency.
- Ensured user-friendly interactions with features like password entry, view, and in-app management.
